Amendments To The Claims

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard Koppel on 07/29/2004.

Cancel claim 20.

In claims 2 and 8, lines 2 respectively, replace "a respective one" with -- respective ones--.

In claims 2 and 8, lines 3-4 respectively, delete "that amplifier's respective second end" and insert -- the respective second string ends driven by said amplifier--.

In claims 3 and 9, lines 3 respectively, after "and", insert -- said --.

In claims 6 and 12, lines 2 respectively, delete ":", and insert --: --.

In claims 6 and 12, lines 4 respectively, delete "and" and insert -- said first input comprising--.

In claims 6 and 12, lines 5-6 respectively, delete "that provide said first input terminals and".

In claim 13, line 14, delete "and alters it in response", and insert -- in the absence of said out-of-range signal, and in response to the presence of said out-of-range signal, provides said feedback signal as an overdrive protection signal for said amplifier--.

Amendment To The Specification

On page 3, line 9; and on page 7, line 11: replace "the invention" with --one embodiment of the invention--.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the prior arts of record fail to teach an analog-to-digital converter, comprising: first and second strings each formed with at least one impedance element; at least one current source coupled to a first end of at least one of said first and second strings; at least one comparator coupled to provide a comparator output signal in response to signals at first and second string taps that are respectively positioned along said first and second strings; first and second differential amplifiers that have first input terminals which together define a differential input port, that have second input terminals that are each coupled through a respective feedback path to a feedback tap positioned between the first and second ends of a respective one of said first and second strings, and that are each coupled to drive a second end of a respective one of said first and second strings; and a decoder coupled to provide an output digital code in response to said comparator output signal..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
